

## **Job Description**

The Assistant Designer/Studio Assistant will support the Design Principal on all projects ranging from designing furniture collections, interior design projects and architectural details. They are creative, self-motivated and have a deep understanding of materiality and construction details.

## **Essential Job Functions**

- Support the team in all areas of design: Concept, Design Development, providing construction drawings for our in-house woodshop.
- Produce renderings, layouts, and graphic presentations to clients (occasionally models).
- At times coordinate design details and production with, consultants, suppliers and other third parties.
- Keep clear and accessible records of correspondence and meetings.
- Research and development for new designs and production methods.
- Helps keep the studio materials library organized and source new materials for projects.
- Send out wood/stone and misc. material samples to clients.

## **Job Requirements**

- 2 years minimum of professional experience demonstrating excellence in design and implementation on several completed projects.
- Proficient in CAD programs including AutoCAD, Sketchup, Rhino, Adobe Creative Suite, or Solidworks, Keyshot. Must be able to utilize these programs to create construction drawings and renderings for presentations.
- Ability to collaborate comfortably with new and existing clients
- Strong graphic presentation skills
- Has some knowledge of woodworking and wood construction techniques.

- Bachelor's degree in Architecture, Furniture or industrial design preferred
- US Resident
